SARKAR ATHENA FTV

ST-ATHE

TACTICAL GEAR

PRODUCT OVERVIEW

After years of research into the best solution for Female Body Armour, we present the Sarkar Athena Female Tactical Vest (ST-ATHE). The shape of the back is completely different to male vests. It moulds perfectly to the back and shoulders. The front is specially designed for the bust and hips. The shapes are thermoformed and can be fully customised based on a range of sizes, providing the optimum balance between protection and performance.

Athena is the world's most complete, purpose-built female body armour. We are incredibly proud of this industry-changing design, which brings full protection and comfort to the fearless women who put their lives on the line every day.

The Sarkar Athena Female Tactical Vest (ST-ATHE) can be worn covertly as part of the uniform. It has functional pockets for storing day to day items and Velcro patches for identification.

<u>The female form is available in all our vest styles - upon request.</u>
